QUICK

TIPS

- 1. Use the keywords of the job description in your resume to appear in the search result of the recruiter from the company.**
- 2. Use bullet Points in Your Resume.**
- 3. Save Your Resume in PDF format and always send it in PDF format to companies**
- 4. If possible showcase your Github Profile, any online link for projects, or LinkedIn profile in your resume**

Himanshu Mahuri

QUICK

TIPS

- 5. Do not use the word 'I' in your resume.**
- 6. Depending on the country, you might need to include a photo in your resume. Make sure it is professional, on a plain background, and with no distracting elements on it.**
- 7. Do not fake anything or your resume shouldn't have any buzzwords which describe that you are great among all the developers, sometimes it makes a negative impact on the recruiter.**
- 8. Do not use more than two colors in Your Resume. For better format use always black and blue colors.**

Himanshu Mahuri

QUICK

TIPS

- 9. Describe what you did earlier in your projects and what was the end result or what was the impact like how performance was improved for the site or customers experience improved or visitors increased because of the transition to the production service.**
- 10. Only include relevant skills in your resume, be precise and clear.**
